Practical – IV

Roll No.:T010	Name:Sagar Kandari
Class:TYIT	Batch:1
Date of Assignment:17-07-26	Date/Time of Submission:17-07-26

a) Create an ASP.NET Web Forms application using simple server controls.

a. Design a Student Registration Form using the following ASP.NET controls:

i. Label and TextBox to accept Student Name
ii. RadioButton to select Gender (Male/Female)
iii. DropDownList to select Course (BSc IT, BSc CS, BCA)
iv. CheckBox for accepting Terms & Conditions
v. Calendar control to select Date
vi. Button control to submit the form
vii. Label control to display the output

Algorithm:

Step 1 – Start.

Step 2 – Declare a delegate with two integer parameters.

Step 3 – Create methods:

- `Add(int a, int b)`
- `Subtract(int a, int b)`
- `Multiply(int a, int b)`
- `Divide(int a, int b)`

Step 4 – In the `Main()` method:

- Create a delegate object.
- Assign the `Add()` method to the delegate and call it.
- Assign the `Subtract()` method to the delegate and call it.
- Assign the `Multiply()` method to the delegate and call it.
- Assign the `Divide()` method to the delegate and call it.

Step 5 – Display the results.

Step 6 – Stop.

Code:

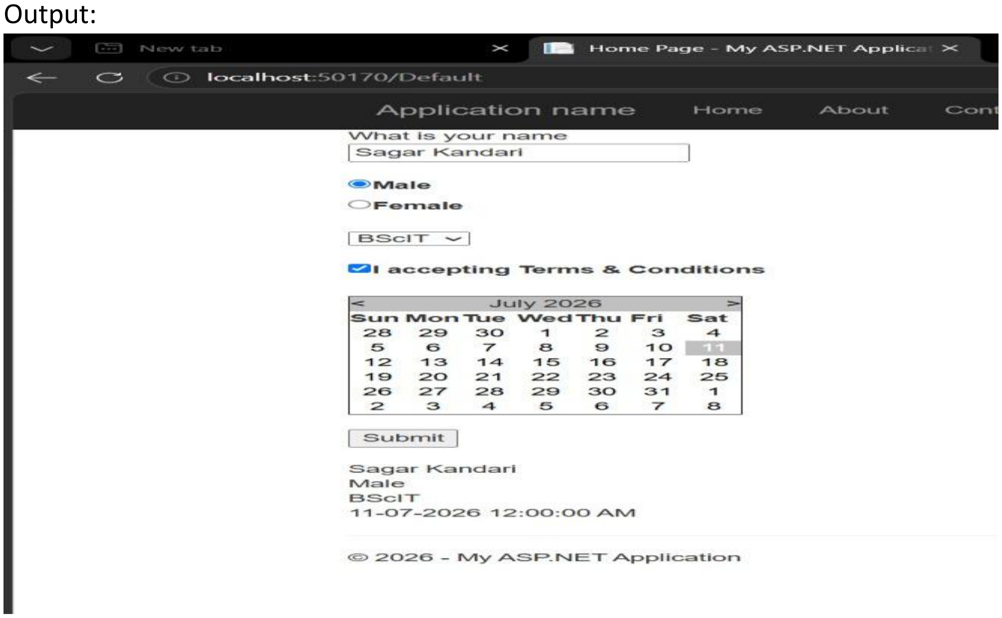
```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

public partial class _Default : Page
{
    protected void Page_Load(object sender, EventArgs e)
    {

    }

    protected void Button1_Click(object sender, EventArgs e)
    {
        string name = TextBox1.Text;
        string Gender = RadioButtonList1.Text;
        string Course = DropDownList1.Text;
        string Date = Calendar1.SelectedDate.ToString();
        Label2.Text = name + "<br/>" + Gender + "<br/>" + Course + "<br/>" + Date;
    }
}
```

Output:



Sagar
T010

b) Create a Registration form to demonstrate use of various Validation controls.

Algorithm:

Step 1 – Start.

Step 2 – Design the form with controls:

- TextBox for Student Name.
- TextBox for Email.
- TextBox for Password and Confirm Password.
- TextBox for Age.
- Button for submission.
- Label for output.

Step 3 – Apply validation controls:

- RequiredFieldValidator → Ensure mandatory fields are filled.
- RegularExpressionValidator → Validate email format and password length.
- CompareValidator → Ensure password and confirm password match.
- RangeValidator → Validate age between 18 and 60.

Step 4 – Wait for user input.

Step 5 – On Submit Button Click:

- Check if `Page.IsValid` is true.
- If valid → process registration.
- If invalid → display error messages.

Step 6 – Display output message:

- If valid → "Registration Successful!".
- If invalid → show validation errors.

Step 7 – Stop.

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

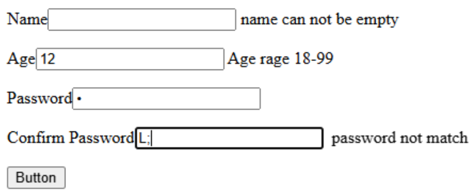
public partial class Sagar : System.Web.UI.Page
{
```

Sagar
T010

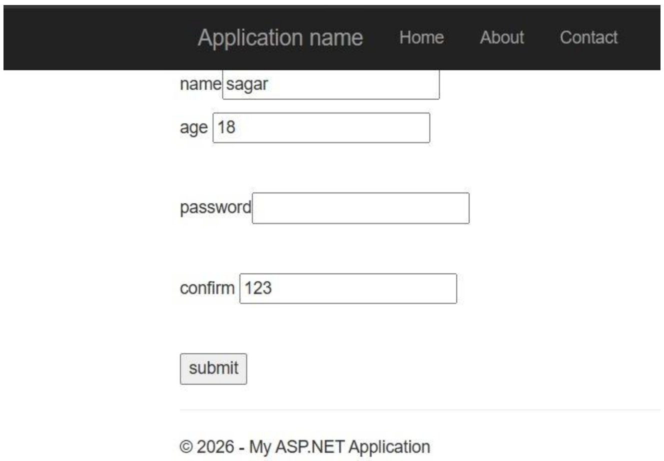
```
    protected void Page_Load(object sender, EventArgs e)
    {

    }
}
```

Output:



2ND



c) Create Web Form to demonstrate use of Adrotator Control.

Algorithm:

Step 1 – Start.

Step 2 – Create an XML file (`Ads.xml`) with ad details (ImageUrl, NavigateUrl, AlternateText, Impressions).

Step 3 – Design a Web Form and add an AdRotator control.

Step 4 – Set the `AdvertisementFile` property of AdRotator to the XML file.

Step 5 – Run the application.

Step 6 – AdRotator randomly selects and displays an advertisement based on impressions.

Step 7 – Stop.

T010

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

public partial class Sagar : System.Web.UI.Page
{
   protected void Page_Load(object sender, EventArgs e)
   {

   }

   protected void AdRotator1_AdCreated(object sender, AdCreatedEventArgs e)
   {

   }
}
```

Xml code -:

```
<Advertisements>
    <Ad>
            <Imageurl>images/img2.png"</Imageurl>
            <Navigateurl>https://www.google.com</Navigateurl>
            <AlternateText>College logo</AlternateText>
            <Height>50</Height>
            <Width>50</Width>
    </Ad>
</Advertisements>
```
