Dot.Net
Practical - I

Name:-Sagar Kandari	Roll no:-T010
Batch:-1	Class:-TYIT
Date of practical:-9/7/26	Date of submission:-9/7/26

1. Write the program for the following:

a. Create an MVC application to perform basic Arithmetic Operations.

Modelmvc.cs

Code:

```
namespace MVCAdd.Models
{
    public class AddModel
    {
        public int A { get; set; }
        public int B { get; set; }
        public int Result { get; set; }
    }
}
```

HomeController.cs

```
using System.Web;
using Microsoft.AspNetCore.Mvc;
using MVCAdd.Models;
namespace MVCAdd.Controllers
{
    public class HomeController : Controller
    {
        public ActionResult Index()
        {
            return View(new AddModel());
        }

        [HttpPost]
        public ActionResult Index(AddModel m)
        {
            m.Result = m.A + m.B;
        }
    }
}
```

```
        return View(m);
    }
}
}
Index.cshtml
@model MVCAdd.Models.AddModel
<h2>Add Two Numbers</h2>
@using (Html.BeginForm())
{
    @Html.TextBoxFor(m => m.A)
    <br /><br />
    @Html.TextBoxFor(m => m.B)
    <br /><br />
    <input type="submit" value="Add" />
    <br /><br />
    <b>Result = @Model.Result</b>
}
}
```

Output:

Practical1a [Home](#) [Privacy](#)

Add Two Numbers

Result = 170

\

b. Create an application to print Floyd's triangle till n rows in C#.

Code:-

```
using System;
class Floyd
{
    static void Main()
    {
        int count = 1;
        for (int i = 0; i < 5; i++) // Rows
        {
            for (int j = 0; j <= i; j++) // Columns
            {
                Console.Write(count + " ");
                count++;
            }
            Console.WriteLine();
        }

        Console.WriteLine("sagar");
    }
}
```

Output:-

Output:

```
1
2 3
4 5 6
7 8 9 10
11 12 13 14 15
sagar
```

c. Write C# code to arrange the name of cities in sorted order. Accept name of 10 cities from the user

Code:-

```
using System;
class Floyd
{
    static void Main()
    {
        string[] city = new string[5];

        for (int i = 0; i < 5; i++)
        {
            Console.Write("Enter city " + (i + 1) + ": ");
            city[i] = Console.ReadLine();
        }
        Array.Sort(city);

        Console.WriteLine("---- Sorted ----");

        for (int i = 0; i < city.Length; i++)
        {
            Console.WriteLine(city[i]);
        }
    }
}
```

Output:-

```
Enter city 1: Mumbai
Enter city 2: Delhi
Enter city 3: Chennai
Enter city 4: Pune
Enter city 5: Kolkata
---- Sorted ----
Chennai
Delhi
Kolkata
Mumbai
Pune
```
